SOCIOLOGY OF DAILY LIFE

The aim of the course is to observe concretely the flow of the social life we live in and to place the relationship between theory and practice in a dynamic framework. The main axis of this approach is to reveal the concrete interaction networks of institutions and different social formations, taking into account social times and places. This course, which is based on the observation of daily life practices, aims to move the theoretical discussions in the field of sociology to a richer field by departing from the concrete practices and relationship styles of the actors. Time, space, moments, habitus, functioning of institutions and individuals in different roles and status are among the main topics of the course. Everyday life and sociological perspective, Theoretical approaches: Lefebvre's Everyday life approach, Michel de Certeau's Theoretical approach, E. Goffman's theory of everyday life, Time and space, The moments of the individual, Institutions and the individual, The concept of habitus and everyday life, Social classes, social spaces and daily life, Life practice and public spaces, Ideologies, beliefs, political thoughts and daily life, Daily life within the framework of family, neighborhood and business relations, A general synthesis.
