SIEMENS LOGISTICS SPECIALIST

For our Energy Management Division in Kartal, we are looking for a Logistics Specialist. This role will be responsible for organizing all logistics activities within order management, sourcing, planning processes (incl. Material planning, master data maintenance, stock optimization, issuing payment & import customs activity requests, demand planning, managing and scheduling customer orders with confirmations, etc.).

What are my responsibilities?

- Demand planning for production materials and material master data maintenance
- Creating material purchase orders and coordinating international transport with the approved transport companies; in the aim of meeting the confirmed delivery dates
- Ensuring that the materials arrive/given at warehouse/production areas on time, complete and in conformity with required conditions & specifications
- Completing required documentation for import operations
- Supporting actively stock optimization activities and sourcing models
- Planning customer demands, giving priorities to production and product master data maintenance
- Creating, confirming, prioritizing customer orders in accordance with production plans
- Creating delivery notes and organizing deliveries together with WM
- Maintaining a high level of delivery reliability against customers as defined in KPIs
- Reporting in various aspects of delivery process (Backlogs, delivery reliability)
- Coordinating return process of defective materials or the materials that are not in conformity with the required specifications, ensuring that replacement material is procured on time

What do I need to qualify for this job?

- 1-3 years of experience in a related field
- Bachelor's degree in Informatics, Business Administration, Economics or Industrial Engineering
- Very good command of English. German will be an asset
- Advanced in MS Office applications
- Experience in SAP MM/PP/SD module

What else do I need to know?

- Male candidates should have completed the military service requirements
