SIEMENS QUALITY & PROCESS SPECIALIST

For our Business Excellence (SBD - BE) group in Kartal, we are looking for a Quality & Process Specialist. This role will be responsible from supporting the Mobility Division regarding the implementation, control and improvement of Quality Management System aligned with the standards (e.g. ISO 9001, 9ME - the mandatory elements of Siemens Quality Management, BPM – Business Process Management), improvement of processes and PM@Siemens (Siemens Global Project Management Systematic) implementation, standardization / harmonization / optimization of processes, developing and implementing measures, formulating and introducing quality methods & tools to improve processes and projects where necessary.

What are my responsibilities?

- Coordinate activities for quality management approaches and their deployment according to Siemens' standards (e.g. 9ME, the mandatory elements of Siemens Quality Management).
- Coordinating and supporting and monitoring the implementation of PM@Siemens activities and requirements.
- Initiating and controlling the application of quality standards in processes/projects.
- Supporting continuous improvement activities in terms of process and system improvement, lessons learned and non conformance cost management
- Conducting internal audits and assessments and follow-up of actions related to ensure compliance to the requirements and Siemens standards.
- Follow-up of internal quality performance; analysis and report of quality related KPIs, and ensuring focused, regular and direct quality reporting.
- Introduction and application of quality methods and tools (6 Sigma, QFD, FMEA, 8D, benchmarking)
- Ensuring up-to-date process documentation (process maps, procedures, roles & responsibility definitions) at QDMS (Quality Document Management) System

What do I need to qualify for this job?

- University degree of Management, Business Administration, Industrial/Mechanical/Electrical Engineering or equivalent experience
- Excellent command of English, German is an asset
- Strong knowledge and experience on Quality and Process Management, Continuous Improvement Methods (6 Sigma Green/Black Belt), statistical methods, reviews und assessments
- Strong knowledge and experience on Project Management Methodologies
- Information on quality tools and methods (FMEA, QFD, 8D, benchmarking)
- Very good command of MS Office applications especially Excel, PowerPoint, Word
- QDMS know-how is an asset
- Analytical thinking, result and quality oriented approach, customer focus, self-determination and good communication skills are required competencies
- Minimum 3 years of experience

What else do I need to know?

- Male candidates should have completed the military service requirements
- Driving license is required
