SIEMENS QUALITY SPECIALIST

For our Business Excellence group in Kartal we are looking for a Quality Specialist. This role will be responsible from supporting the implementation, control and improvement of Quality Management System aligned with the standards (e.g. ISO 9001, 9ME - the mandatory elements of Siemens Quality Management), improvement of processes and implementation, standardization / harmonization / optimization of processes, developing and implementing measures, formulating and introducing quality methods & tools to improve processes where necessary.

What are my responsibilities?

- Ensuring sustainability of a consistent Quality Management System based on related requirements and in alignment with the standards to fulfill customer requirements. Coordinate activities for quality management approaches and their deployment according to Siemens' standards.
- Initiating and controlling the application of quality standards in processes/projects.
- Supporting continuous improvement activities in terms of process and system improvement, lessons learned and NCC (non-conformance cost) management. Introduction and application of quality methods and tools (6 Sigma, FMEA, benchmarking..)
- Conducting internal audits and assessments and follow-up of actions related to ensure compliance to the requirements and Siemens standards.
- Follow-up of internal quality performance; analysis and report of quality related KPIs and implementation of regular quality reporting system.
- Contributing to Supplier Quality Management in alignment with Siemens SCM (Supply Chain Management) rules and regulations to increase the supplier quality.
- Governance and coordination of QDMS (Quality Document Management System), ensuring its implementation and utilization & tool administration.
- Governance and coordination of TR&S (Technical Regulation & Standardization) Management. Actively pursue Siemens' global strategies to support the business mission and organizational targets of the company. Coordination of internal TR&S committee, participation in Mirror Technical Committees, set up & improvement of relations and cooperation issues with national legislation bodies.
- Compilation of Product Safety Report for Siemens Turkey.

What do I need to qualify for this job?

- University degree of Management, Business Administration, Industrial/Mechanical/Electrical Engineering or equivalent experience
- Minimum 3 years of knowledge and experience on Quality Management Systems
- Excellent command of English, German is an asset
- Strong knowledge and experience on Quality and Process Management, Continuous Improvement Methods(6 Sigma Green Belt), statistical methods, reviews und assessments
- Information on statistical methods, audits and assessments, quality tools and methods
