CALL FOR PAPERS

The second International İstiklal Symposium, organized by Kahramanmaraş İstiklal University, is scheduled to take place from July 3 to 6, 2025. Our university is proud to host the second of this symposium, which aims to make significant contributions to the academic community. This year's theme, "Green Transformation and Digitalization," focuses on the most pressing global challenges of our time. The 2nd International İstiklal Symposium will provide a platform for discussing the integration of green economy principles with digital technologies in alignment with sustainable development goals. The symposium also aims to share experiences, exchange ideas, and develop innovative solutions to address these challenges. The symposium will explore how digitalization can support and enhance green transformation processes while examining the environmental, social, and economic impacts resulting from the intersection of these two domains. Symposium participants, academics, industry professionals, representatives from public institutions, and non-governmental organizations will have the opportunity to discuss how green technologies and digital tools can contribute to achieving sustainability goals. Awards will be presented to selected full-text papers, abstract papers, poster presentations, and thesis presentations submitted to the symposium. Additionally, panels and workshops held throughout the symposium will provide practical knowledge and insights into the latest advancements in green transformation and digitalization, offering participants valuable hands-on experience.

Through these efforts, the symposium aims to foster innovative ideas and strengthen collaborations. By bringing together stakeholders from diverse fields, the symposium seeks to create a shared vision for a sustainable future and a digital society.

All papers submitted to the symposium must be presented in either Turkish or English. For papers written in Turkish, an English title, abstract, and keywords are required. Researchers interested in participating in the 2nd International İstiklal Symposium, which will be held in both online and in-person formats, can access detailed information at https://www.istiklal.edu.tr/iis.
