**Dear Scientist Colleague,**

The Energy Transition and Sustainability Conference, which was initiated by Istanbul Gedik University Energy Technologies Application and Research Center (ETARC) with the Energy Summit in 2024, continued nationally in 2025 and internationally in 2026, and will be held **internationally** again this year.

**The 2nd International Energy Transition and Sustainability Conference (ETSC'27) will be held face-to-face and online at Istanbul Gedik University between January 13-15, 2027.**

The aim of our conference, which is open to original academic studies from different branches of science on energy transition and sustainability, is to bring together scientists working in different disciplines, to ensure knowledge interaction between disciplines and to draw the attention of the scientific world to qualified studies.

The presentation language of our conference, which will be English or Turkish, will be organized based on subject and discipline.

We are waiting for you at our conference with your valuable studies.

## CALL FOR PAPERS

The focus of the **International Energy Transition and Sustainability Conference (ETSC'27)** is to ensure that scientific studies on energy transition are addressed with applicable, adaptable and improvable foundations within the perspective of sustainability. New scientific studies obtained as a result of the conference will contribute to the literature by increasing the interaction between scientists from different disciplines at the international level. It will also create opportunities for new studies that adopt a sustainability approach.

## CONFERENCE THEMES

Our conference is open to interdisciplinary studies addressing the theme of "energy transition and sustainability" across a broad range of fields, including but not limited to those listed below.
